Joseph Hassan

AI Software Developer • Python, AI and Microsoft business apps

United Kingdom · Freelance: JhCodeQuest@protonmail.com · github.com/JHCodeQuest · linkedin.com/in/joseph-hassan-8679ba17

PROFILE

AI Software Developer building Python and Claude API tools that a sales and client-success team uses every week, after four years delivering ASP.NET, SQL and Power Platform business systems in local government.

I build with AI coding agents (Claude Code, Codex and OpenCode): I write the specs, make the design decisions, review every change and own what ships. I care about outputs that can be checked, costs that cannot run away, and software that stays safe to change.

SKILLS

AI and LLMs
Claude API, Batch API, prompt caching, model evaluation, output verification, cost guards, Claude Code, Codex, OpenCode

Microsoft and business apps
Power Apps (Canvas and Model-Driven), Power Automate, Dataverse, Dynamics 365 F&O, SSRS, Azure, Azure Logic Apps

Web
TypeScript, JavaScript, React, Next.js, Astro, Cloudflare Workers

DevOps and security
Docker, Docker Compose, Coolify, Cloudflare, GitHub Actions, Semgrep, gitleaks, Trivy

Python
Python, FastAPI, Pydantic, httpx, SQLite, pytest, CLI tools

.NET and data
C#, ASP.NET, SQL, REST APIs, data modelling

Integrations
Slack API, Google Cloud Run, S3 / R2 storage, HTML to PDF with headless Chromium

Delivery
Requirements gathering, user acceptance testing, documentation, Agile, production support

TECHNICAL EXPERIENCE

AI Software Developer • B2B lead-generation agency

2026 – Present

- Built and run a Slack slash command that pulls live campaign data and returns a client report, an internal action plan and a crib sheet as PDFs in seconds (FastAPI, headless Chromium, Docker, Coolify behind Cloudflare).
- Built weekly coaching scores from sales call transcripts on the Claude Batch API with prompt caching: the model quotes the evidence, plain Python makes every judgement, so rules stay readable and changing one never means paying to re-run the AI.
- Added Claude grading of free-text notes, measured against hand-marked answers, with every summary fact-checked before it reaches a client page and a rules-based fallback.
- Kept it safe to change: a blocking pre-deploy security gate (Semgrep, gitleaks, Trivy), 1,000+ automated tests that never reach the network, pinned dependencies and spend guards.

Independent learning projects • Own time

2024 – Present

- Civic Lens: a plain-language guide to UK politics on Next.js and TypeScript with a FastAPI backend that falls back to bundled data, so one build also runs as a static site.
- AI Stock Assistant: warehouse stock matched from a photo by TensorFlow.js in the browser, with a React dashboard and JWT accounts on an Express API.
- Entropy Wordle Bot and PyFileAutomation: an information-theory Wordle solver, and a file organiser with a dry run, logging and Discord summaries, both in Python.

Junior AX Developer • Origin Enterprises plc

Jul 2024 – Sep 2024

- Developed and modified data entities and forms in Microsoft Dynamics 365 Finance and Operations.
- Built and maintained SSRS reports, and supported system updates and production deployments.

Software Developer and Power Platform Developer • Somerset Council Mar 2020 – Apr 2024

- Developed and maintained internal ASP.NET applications and SQL-backed systems for data capture, reporting and operational processes.
- Built a secure social care portal used by external professionals, and COVID-19 tracking systems supporting frontline services.
- Built Canvas and Model-Driven Power Apps and Power Automate flows, and integrated Azure services and Logic Apps with enterprise systems.
- Worked in Agile-style teams with stakeholders across departments, and supported debugging, maintenance and production deployments.

OTHER EXPERIENCE

Domiciliary Carer · Cotswold Carers May 2026 – Jun 2026

Stores Operative · Alpine F1 Team Jul 2025 – Mar 2026

Retail Assistant and Deli Team Member, later self-checkout supervisor · Morrisons 2015 – Mar 2020

EDUCATION

BSc Computer Science (2:1) · The Open University, via Bridgwater & Taunton College 2017 – 2018

HND Computing and Systems Development · Bridgwater & Taunton College 2015 – 2017

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals

SQL Fundamentals (SoloLearn)
